

Ideation Phase Empathize & Discover

Date	22 June 2026
Name	Giritharan D
Project Name	An employee or students submits an innovation idea through the Innovation Hub, where it is reviewed by a reviewer and approved or rejected by a manager.
Maximum Marks	4 Marks

Empathy Map Canvas:

The empathy map represents the thoughts, feelings, actions, and expectations of the primary user (Employee / Student / Idea Submitter) while submitting and tracking innovation ideas through the InnovateHub application in ServiceNow. It helps identify user challenges such as uncertainty about the review process, lack of visibility into idea status, delayed feedback, and manual communication between employees, reviewers, and managers.

The analysis shows that users expect a simple, transparent, and user-friendly platform where they can submit innovative ideas effortlessly, monitor the progress of their submissions in real time, receive timely feedback from reviewers and managers, and clearly understand the final approval decision. These insights guided the development of the InnovateHub: Innovation Idea Portal, which automates the idea submission, review, approval, and tracking process using ServiceNow workflows, role-based access control, and notifications, thereby improving collaboration, transparency, and overall organizational innovation management.
