

Project Design Phase Proposed Solution Template

Date	25 June 2026
Name	Giritharan D
Project Name	An employee or students submits an innovation idea through the Innovation Hub, where it is reviewed by a reviewer and approved or rejected by a manager.
Maximum Marks	2 Marks

Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Organizations often manage innovation ideas manually through emails, spreadsheets, or paper forms. This results in poor tracking, delayed reviews, duplicate ideas, and limited visibility into the innovation process.
2.	Idea / Solution description	InnovateHub is a ServiceNow-based Innovation Idea Portal where employees submit ideas, reviewers evaluate them with comments and review status, and managers approve or reject ideas. The solution uses forms, ACLs, client scripts, UI policies, and Flow Designer for secure automation. Workflow: Employee submits an idea → Idea stored in Innovation table → Reviewer reviews and updates status → Manager approves or rejects → Final status is displayed to the employee with complete transparency. Role-based security ensures that Users, Reviewers, and Managers can edit only their assigned sections, improving accountability and protecting sensitive information.

		a completely Silent Installation of the requested software package. • Compliance & Packaging: Concurrently, the system ensures data sync and logging by pushing real-time audit data down to the sys_audit Log table, while configuration updates are seamlessly bundled into an Update Set Package for governance tracking.
--	--	---

3.	Novelty / Uniqueness	InnovateHub provides a centralized platform for idea management with secure role-based access, automated review and approval workflow, and real-time status tracking. This improves collaboration and encourages innovation across the organization.
4.	Social Impact / Customer Satisfaction	Employees can easily submit ideas and monitor progress. Reviewers and managers can evaluate ideas faster, reducing manual effort while improving transparency, decision-making, and overall user satisfaction.
5.	Business Model (Revenue Model)	The application delivers value by reducing manual work, improving idea management efficiency, and encouraging employee participation. Future enhancements such as dashboards, AI-based idea ranking, and notifications can further increase business value.
6.	Scalability of the Solution	Built on the ServiceNow platform, InnovateHub can support large numbers of users and idea submissions. Configurable workflows and reusable components make it easy to extend across departments.
