Project Name	An employee or student submits an innovation idea through InnovateHub, where it is reviewed by a reviewer and approved or rejected by a manager.
Maximum Marks	4 Marks

managers to make final approval decisions. Role-based access control, client scripts, ACLs, and workflow automation ensure that each user can only access the appropriate functions.

Key Objectives

- Centralize innovation idea submission.
- Automate review and approval workflow.
- Provide secure role-based access.
- Track idea status from submission to approval.
- Improve transparency and collaboration.
