

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	23 June 2026
Name	Giritharan D
Project Name	An employee or students submits an innovation idea through the Innovation Hub, where it is reviewed by a reviewer and approved or rejected by a manager.
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Idea Submission	Employees can submit innovation ideas using the Innovation Idea form. • The system validates mandatory fields before saving the idea.
FR-2	Idea Review Process	Reviewers can view assigned innovation ideas. • Reviewers can add review comments and update the review status.
FR-3	Manager Approval	Managers can review ideas after the reviewer completes the evaluation. • Managers can approve or reject ideas and provide approval comments.
FR-4	Role-Based Access Control	Users can edit only the Idea Details section. • Reviewers can edit only the Idea Status section. • Managers can edit only the Manager Approval section using roles, ACLs, and client scripts.
FR-5	Status Tracking & Notifications	The system automatically updates the overall idea status after each review stage. • Users can track the progress of their submitted ideas, and notifications are sent for important status changes.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should provide a simple and user-friendly interface that allows employees, reviewers, and managers to perform their tasks with minimal training.
NFR-2	Security	The system must implement role-based access control (RBAC), ACLs, and client scripts to ensure that users can access and edit only the fields assigned to their roles.
NFR-3	Reliability	The application should store innovation ideas securely and maintain accurate records throughout the submission, review, and approval process without data loss.
NFR-4	Performance	The system should load forms quickly, save records efficiently, and update idea status without noticeable delays during normal usage.
NFR-5	Availability	The InnovateHub application should be available to users during business hours with minimal downtime, ensuring uninterrupted idea submission and review activities.
NFR-6	Scalability	The system should support an increasing number of users and innovation ideas without affecting application performance or response time.
