1. Purpose of Document

The purpose of this document is to summarize the User Acceptance Testing (UAT) activities carried out for the InnovateHub: Innovation Idea Portal project before its final deployment. It provides an overview of the test execution, feature validation, defect resolution, and overall application quality to ensure that the system meets the functional and business requirements. The document also confirms that the application including idea submission, reviewer evaluation, manager approval, role-based access control, status tracking, and notifications—has been successfully tested and is ready for end-user validation and production deployment.

2. Defect Analysis

This report summarizes the number of defects identified during the testing of the InnovateHub: Innovation Idea Portal application, categorized by severity and their final resolution status.
